<PRE>
<H1>IMAGE STYLE</H1>

we cna write inline style : ka style attrb is better cuz its override it

u can ovveride a style with a style but u cant with attribute;

style="width:500px;height:600px;

or  as width="500" height="600"

<p>
<img src="CLOVE.jpg" alt="clove" style="float:right;width:42px;height:42px;">

A paragraph with a floating image. A paragraph with a floating image. A paragraph with a
floating image.
</p>
<!--
body {

background-image: url('example_img_girl.jpg'); or style="background-
image:url('example_img"
